

# Process Technician

JOB REF: FER396174

- **Join a hardworking team in a dynamic role where you will be integral to plant operations**
- **Rare opportunity to develop your career in Process Operations**
- **Permanent full time shift roster role (Sportsman roster -12 hour shifts, 2:2 4 off, 2:3 4 off, 3:2 5 off)**

Agriculture has come a long way over the past 100 years, and CSBP Fertilisers has been there every step of the way. Part of Wesfarmers Chemicals, Energy & Fertilisers, we proudly display our Western Australian roots, yet firmly focus on the future.

We have seen a lot of change over the years, but the one constant has been our people and their dedication to continual discovery and collaboration. Our mission is to build a talented and engaged workforce through fostering an environment where diverse thinking, skills and experiences are welcomed.

## **The role:**

We are seeking a Process Technician to work as part of the process plant production team to make quality fertiliser products for our Growers. You will receive structured training and support, and be a key player in a business that continuously strives to better meet customer needs.

You will be dedicated to the safe operation and maintenance of plant and equipment within specified guidelines. CSBP employees look after each other to meet daily goals and look for ways to improve the business.

## **Your key responsibilities will include:**

- Carrying out all work according to environmental policies and procedures and prioritise safety for self and others in all practices.
- Involvement in plant start-ups, shutdowns and achievement of plant utilisation and production targets.
- Assisting with plant problem solving and process improvements.
- Ensuring accurate record keeping including daily log reports, development of isolation check sheets and raising work orders for equipment.
- Prioritising your safety, and the safety of others in all practices.

## **Do you have a mixture of the following skills and experience?**

- The ability to build and maintain positive working relationships and also self-motivate to work without supervision.
- Strong approach to safety.
- Excellent analytical skills.
- Experience in manufacturing operations highly regarded
- Knowledge and operation of control systems with the ability to carry out duties in accordance with documented procedures and an understanding of permitting systems.
- Certificate IV in Process Technologies/Operations or working towards one is highly desirable.

We welcome people with different skills, and life experiences and encourage individuals from diverse backgrounds to apply.

We pride ourselves on developing and supporting people and recognise the importance of flexibility. When you apply, please let us know if you are seeking a flexible employment arrangement.

**Applications close: 5pm Sunday, 18 October 2020**

*We reserve the right to commence the recruitment process prior to the closing date. It is recommended to apply as soon as possible.*
